12-Day Expedition and Cruise aboard the *Hanseatic*

12-Day Expedition & Cruise

An expedition to Antarctica is an unforgettable journey of discovery. The continent has lured explorers, adventurers and scientists for more than two centuries, and now CEO embarks on a luxury expedition here. This breathtakingly immense wilderness is a virtually pristine paradise for wildlife with incomparable scenery of mountains, snow and ice.

Come travel with Chairs, **Fraser and Trish Morrison** past magnificent icebergs on the *Hanseatic*, one of the most luxurious ships sailing to Antarctica. You can expect to see penguins, albatross, whales, seals and a host of other wildlife.

The light, ice and wildlife combine to make Antarctica one of the most special continents in the world.

From the decks of the *Hanseatic*, you'll witness a never-ending procession of sculpted icebergs, like the huge tubular icebergs that span the size of several football fields. For anyone who loves nature and exotic locations, this cruise is a perfect choice.

ITINERARY

23 January

- Arrive in Buenos Aires, Argentina

23-24 January

- Education and off-sites

25 January

- Charter flight to Ushuai
- Board *Hanseatic*

EVENT COMMITTEE

Fraser & Trish Morrison, *College Chairs*

Tony & Anita Garnier, *Social Chairs*

Jim & Tam Martin, *Senior Advisors*

MASTER CLASSES

Throughout our expedition, Master Classes will enable you to take a minor interest to a major passion. Each Class will be developed and led by a CEOer who is passionate on the subject. Then, acknowledged experts will join us for the cruise to spend the entire 10 days with CEO.

The Environment of Antarctica – Enhance your on-board learning with an in-depth examination of the environment of this special place, and the impact of global warming.

Photography – Against breathtaking scenery, learn about wildlife photography and the special light considerations of shooting in ice and snow. A photo editing workshop complements this class.

Astrology & Astronomy – Understand the science of astronomy and study of astrology in the land of the aurora australis, or Southern Lights.

Literature – Through carefully selected books, writings and discussion groups, rediscover the 19th and 20th centuries, a period of history when exploration of the world was a pastime of the rich and famous.

The Wines of South America – After Europe, South America is the world's most important wine producing continent and its most important national producer is Argentina. Onboard wine tastings and lectures will be enhanced with a Pre-Acadmey to the wine region of Argentina.
